For adults newly diagnosed with malignant pleural mesothelioma (MPM) that cannot be removed by surgery

1ST + ONLY COMBINATION OF IMMUNOTHERAPIES

OPDIVO + YERVOY will not work for everyone. Individual results may vary.
Please see information about the Clinical Trial Results. Please see serious side effects on the next page.

What is OPDIVO + YERVOY?

OPDIVO is a prescription medicine used in combination with YERVOY (OPDIVO + YERVOY) to treat a type of cancer called malignant pleural mesothelioma, which affects the lining of the lungs and chest wall. OPDIVO + YERVOY is approved as a first treatment for adults with malignant pleural mesothelioma that cannot be removed by surgery.

It is not known if OPDIVO is safe and effective in children younger than 18 years of age.

OPDIVO (10 mg/mL) and YERVOY (5 mg/mL) are injections for intravenous (IV) use.

Information provided in this brochure is not a substitute for talking with your healthcare professional. Your healthcare professional is the best source of information about your disease.
The first FDA-approved immunotherapy for newly diagnosed malignant pleural mesothelioma

There may be good may be good news for some people with this rare condition: OPDIVO + YERVOY is FDA approved to treat it. See how this unique combination of 2 immunotherapies performed in a clinical trial.

In a study of 605 previously untreated patients with malignant pleural mesothelioma that could not be removed by surgery, 303 were given OPDIVO + YERVOY and 302 were given platinum-based chemotherapy.

A CHANCE TO LIVE LONGER™

IN THE PRIMARY ANALYSIS (MINIMUM FOLLOW-UP OF 22.1 MONTHS):

OPDIVO + YERVOY reduced the risk of dying by 26% compared to platinum-based chemotherapy.

Half of patients on OPDIVO + YERVOY were alive at 18.1 months compared to 14.1 months on platinum-based chemotherapy.

AT 2 YEARS

41% of patients were alive on OPDIVO + YERVOY

and

27% of patients were alive on platinum-based chemotherapy

The analysis at this time point was not designed to show a difference between OPDIVO + YERVOY and platinum-based chemotherapy.

Please see Important Facts about side effects on the right panel. Please see full Prescribing Information and Medication Guides for OPDIVO and YERVOY in the links below.

Ask your doctor if this treatment option is right for you. OPDIVO + YERVOY

OPDIVO + YERVOY

Your immune system activates T cells to protect you from foreign threats, including cancer. But cancer cells can hide from T cells and make them inactive.

OPDIVO + YERVOY join forces in different but complementary ways to help your active T cells.

OPDIVO Helps active T cells identify cancer cells that are hiding.

With OPDIVO + YERVOY, more active T cells may be able to help seek and destroy cancer cells.

OPDIVO helps generate more active T cells.

Some active T cells generated with YERVOY can become memory T cells, which may help recognize and defend against these threats in the future.

The clinical significance of memory T cells (how well their response could treat cancer) is not yet known or understood.

OPDIVO and YERVOY can cause your T cells to attack healthy cells contained within organs and tissues in any area of your body and can affect the way they work. These problems can sometimes become serious or life-threatening and can lead to death, and may happen anytime during treatment or even after treatment has ended. You may have more than one of these problems at the same time. Some of these problems may happen more often when OPDIVO is used in combination with YERVOY. Your doctor will check you for these problems during treatment. Your doctor may treat you with corticosteroid or hormone replacement medicines. Your healthcare provider may also need to delay or completely stop

Your treatment plan at a glance

Start with OPDIVO + YERVOY followed by OPDIVO alone, then repeat.

OPDIVO + YERVOY

- Week 1: 360 mg
- Week 3: 360 mg
- Week 6: 360 mg
- Week 9: 360 mg

OPDIVO

- Week 1: 360 mg
- Week 3: 360 mg
- Week 6: 1 mg/kg
- Week 9: 1 mg/kg

REPEAT CYCLE

Treatment continues as your doctor monitors your condition to ensure treatment is working and side effects are manageable, or up to 2 years.

OPDIVO

- Week 1: 360 mg
- Week 3: 360 mg
- Week 6: 1 mg/kg
- Week 9: 1 mg/kg

OPDIVO + YERVOY

- Week 1: 360 mg
- Week 3: 360 mg
- Week 6: 360 mg
- Week 9: 360 mg

OPDIVO + YERVOY

- Week 1: 360 mg
- Week 3: 360 mg
- Week 6: 360 mg
- Week 9: 360 mg

Infusion times:
- 30 minutes OPDIVO
- 30 minutes YERVOY

OPDIVO and YERVOY are 2 different medicines that are delivered into your vein through an intravenous (IV) line. You will be given separate infusions of OPDIVO and YERVOY.

Talk to your doctor to learn how many treatments may be right for you. These are the recommendations about treatment, timing, and dosing. Your doctor will decide how many treatments you need. Your healthcare provider will do blood tests to check you for side effects, and may treat you with corticosteroid or hormone replacement medicines, and delay or completely stop treatment if you have side effects that are severe. Be sure to talk to your healthcare team about side effects.

Frequent communication with your healthcare team is an important part of treatment. Use your appointments to let them know how you’re feeling and ask any questions you may have. You may also be able to talk with others going through a similar situation.

See Important Facts for information about pregnancy, nursing, health problems, and other medicines that you should not take.

Questions and Answers

**Q** How is OPDIVO (nivolumab) + YERVOY (ipilimumab) different from chemotherapy?

**A** OPDIVO + YERVOY is an immunotherapy treatment. It is a combination of medicines that works with your immune system.

**Q** Where can I go to get infusions of this treatment?

**A** You and your doctor should discuss the best place to get your infusions, whether it’s at your doctor’s office, an infusion center, or a community or university hospital.

**Q** How do I know if I’m responding to this treatment?

**A** While undergoing treatment, your doctor will likely order periodic scans to evaluate whether there are any changes in the size of your tumors.

**Q** Who can I talk to if I need help or have questions?

**A** Talk with your healthcare professional first if you have questions about this treatment option. You can also call a Care Navigator at 1-855-673-4861, 8 AM to 8 PM ET, Monday to Friday for general questions about OPDIVO not specific to your health.

Important Facts About OPDIVO® (nivolumab) and OPDIVO + YERVOY® (ipilimumab)

This is a summary of important information that you need to know about OPDIVO and OPDIVO + YERVOY. Your healthcare team can work with you to help answer any questions you may have about these medications. Keep this information in a safe place so you can refer to it before and during your treatment.

Look out for the following icons as you read:
- Talk to your healthcare team
- Call a healthcare provider right away
- Helpful information to remember

What is OPDIVO + YERVOY?

OPDIVO is a prescription medicine used in combination with YERVOY (OPDIVO + YERVOY) to treat a type of cancer called malignant pleural mesothelioma, which affects the lining of the lungs and chest wall, in adults. OPDIVO + YERVOY may be used as your first treatment for malignant pleural mesothelioma that cannot be removed by surgery.

It is not known if OPDIVO is safe and effective in children younger than 18 years of age.

What is the most important information I should know about OPDIVO + YERVOY?

OPDIVO and YERVOY are medicines that may treat certain cancers by working with your immune system. OPDIVO and YERVOY can cause your immune system to attack normal organs and tissues in any area of your body and can affect the way they work. Some of these problems may happen more often when OPDIVO is used in combination with YERVOY.

Get medical help immediately if you develop any of these signs or symptoms or they get worse. It may keep these problems from becoming more serious. Your healthcare team will check you for these problems during treatment and may treat you with corticosteroid or hormone replacement medicines. If you have severe side effects, your healthcare team may also need to delay or completely stop your treatment.

What are the serious side effects of OPDIVO and OPDIVO + YERVOY?

A serious side effect is a side effect that can sometimes become severe or life-threatening and can lead to death. They may happen anytime during treatment or even after your treatment has ended. You may have more than one of these problems at the same time.
Call or see your healthcare provider right away if you develop any new or worse signs or symptoms, including:

**Lung problems** — Things to look out for may include:
- new or worsening cough
- shortness of breath
- chest pain

**Intestinal problems** — Things to look out for may include:
- diarrhea (loose stools) or more frequent bowel movements than usual
- stools that are black, tarry, sticky, or have blood or mucus
- severe stomach-area (abdominal) pain or tenderness

**Liver problems** — Things to look out for may include:
- yellowing of your skin or the whites of your eyes
- pain on the right side of your stomach area (abdomen)
- bleeding or bruising more easily than normal
- severe nausea or vomiting
- dark urine (tea colored)

**Hormone gland problems** — Things to look out for may include:
- headaches that will not go away or unusual headaches
- eye sensitivity to light
- eye problems
- rapid heartbeat
- increased sweating
- extreme tiredness
- weight gain or weight loss
- feeling more hungry or thirsty than usual
- urinating more often than usual
- hair loss
- feeling cold
- constipation
- your voice gets deeper
- dizziness or fainting
- changes in mood or behavior, such as decreased sex drive, irritability, or forgetfulness

**Kidney problems** — Things to look out for may include:
- decrease in your amount of urine
- blood in your urine
- swelling in your ankles
- loss of appetite

**Skin problems** — Things to look out for may include:
### Skin problems — Things to look out for may include:
- rash
- itching
- skin blistering or peeling
- painful sores or ulcers in the mouth or nose, throat, or genital area

### Eye problems — Things to look out for may include:
- blurry vision, double vision, or other vision problems
- eye pain or redness

Problems can also happen in other organs and tissues. These are not all the signs and symptoms of immune system problems that can happen with OPDIVO and YERVOY. Call or see your healthcare provider right away for any new or worsening signs or symptoms, which may include:
- Chest pain, irregular heartbeat, shortness of breath, swelling of ankles
- Confusion, sleepiness, memory problems, changes in mood or behavior, stiffness, balance problems, tingling or numbness of the arms or legs
- Double vision, blurry vision, sensitivity to light, eye pain, changes in eyesight
- Persistent or severe muscle pain or weakness, muscle cramps
- Low red blood cells, bruising

---

### What are the possible side effects of OPDIVO + YERVOY?

**OPDIVO and OPDIVO + YERVOY can cause serious side effects, including:**

See the previous section, “What is the most important information I should know about OPDIVO + YERVOY?”

### Severe infusion reactions — Things to look out for may include:
- chills or shaking
- itching or rash
- flushing
- shortness of breath or wheezing
- dizziness
- feel like passing out
- fever
- back or neck pain
Tell your healthcare team right away if you get these symptoms during an infusion of OPDIVO or YERVOY.

Complications, including graft-versus-host disease (GVHD), of bone marrow (stem cell) transplant that uses donor stem cells (allogeneic). These complications can be severe and can lead to death. These complications may happen if you underwent transplantation either before or after being treated with OPDIVO or YERVOY. Your healthcare provider will monitor you for these complications.

What are the most common side effects?
The most common side effects of OPDIVO when used in combination with YERVOY include:

- feeling tired
- diarrhea
- rash
- itching
- nausea
- pain in muscles, bones, and joints
- fever
- cough
- decreased appetite
- vomiting
- stomach-area (abdominal) pain
- shortness of breath
- upper respiratory tract infection
- headache
- low thyroid hormone levels (hypothyroidism)
- decreased weight
- dizziness

These are not all the possible side effects. Talk to your healthcare team or pharmacist for more information. You are encouraged to report side effects of prescription drugs to the FDA. Call 1-800-FDA-1088.

What should I discuss with my healthcare team before receiving OPDIVO or YERVOY?

Tell your healthcare provider about all your medical conditions, including if you:

- have immune system problems such as Crohn’s disease, ulcerative colitis, or lupus
- have received an organ transplant
- have received or plan to receive a stem cell transplant that uses donor stem cells (allogeneic)
What should I discuss with my healthcare team before receiving OPDIVO or YERVOY?

Tell your healthcare provider about all your medical conditions, including if you:

- have immune system problems such as Crohn’s disease, ulcerative colitis, or lupus
- have received an organ transplant
- have received or plan to receive a stem cell transplant that uses donor stem cells (allogeneic)
- have received radiation treatment to your chest area in the past and have received other medicines that are like OPDIVO
- have a condition that affects your nervous system, such as myasthenia gravis or Guillain-Barré syndrome
- are pregnant or plan to become pregnant. OPDIVO and YERVOY can harm your unborn baby.
- are breastfeeding or plan to breastfeed. It is not known if OPDIVO or YERVOY passes into your breast milk. Do not breastfeed during treatment with OPDIVO or YERVOY and for 5 months after the last dose of OPDIVO or YERVOY.

Females who are able to become pregnant:

Your healthcare provider should do a pregnancy test before you start receiving OPDIVO or YERVOY.

- You should use an effective method of birth control during your treatment and for at least 5 months after the last dose of OPDIVO or YERVOY. Talk to your healthcare provider about birth control methods that you can use during this time.
- Tell your healthcare provider right away if you become pregnant or think you may be pregnant during treatment with OPDIVO or YERVOY. You or your healthcare provider should contact Bristol Myers Squibb at 1-844-593-7869 as soon as you become aware of a pregnancy.

Tell your healthcare provider about all the medicines you take, including:

- prescription medicines
- over-the-counter medicines
- vitamins
- herbal supplements

Please see U.S. Full Prescribing Information and Medication Guide for OPDIVO. Please see U.S. Full Prescribing Information and Medication Guide for YERVOY, or talk to your healthcare team.
For adults newly diagnosed with malignant pleural mesothelioma (MPM) that cannot be removed by surgery

**SIGN UP** for OPDIVO with You.

OPDIVO with You means just that: we’re here to help you better understand OPDIVO, whether you or a loved one are just considering OPDIVO or already have an OPDIVO prescription. This complimentary program includes the following resources.

Sign up and you’ll receive:

**Helpful Information**
Get useful tips, tools, and educational materials that can help you learn more about OPDIVO and may help support your care.

**Support and Advocacy Groups**
We can direct you to organizations that may be helpful for the challenges you may face.

**A Care Counselor as Close as Your Phone**
If you are prescribed OPDIVO and sign up for this additional resource, you’ll be able to speak with a registered nurse. This personal Care Counselor can answer questions about treatment and help you to be a more informed partner with your doctor. Care Counselors cannot provide medical advice. Your healthcare professional is the best source of information about your health.

If you’d like to sign up for the OPDIVO with You program, or if you have general questions about OPDIVO, call 1-855-OPDIVO-1 (1-855-673-4861) 8 AM to 8 PM ET, Monday to Friday, or visit www.OPDIVOwithYou.com

For more information call 1-855-OPDIVO-1 or visit www.OPDIVO.com

Bristol Myers Squibb is committed to helping patients throughout their treatment
Financial Resources

Patient Access, Reimbursement, and Co-Pay Support

Available through Bristol Myers Squibb Access Support®

Bristol Myers Squibb is committed to helping patients gain access to their prescribed BMS medications. That’s why we offer the BMS Access Support program, which provides resources to help patients understand their insurance coverage and find information on sources of financial support, including co-pay assistance for eligible commercially insured patients.

For more information, ask your doctor, visit BMS Access Support, or call BMS Access Support at 1-800-861-0048, 8 AM to 8 PM ET, Monday–Friday.

Other Patient Resources*

The Mesothelioma Applied Research Foundation (Meso Foundation)
www.curemeso.org

The Mesothelioma Applied Research Foundation (Meso Foundation) is the only nonprofit charity organization dedicated to ending mesothelioma, and the suffering caused by this cancer, by funding research to improve treatment options; providing treatment support and education for patients and their families; and advocating for federal funding of research.

CancerCare
www.cancercare.org

The mission of CancerCare is to provide free professional support services to anyone affected by cancer.

Cancer Research Institute
www.cancerresearch.org

Cancer Research Institute (CRI) is dedicated to pursuing research in and advancing awareness of immunotherapy for cancer.

Cancer Support Community
www.cancersupportcommunity.org

The Cancer Support Community is an international nonprofit dedicated to providing support, education, and hope to people affected by cancer and their loved ones.
